COURSEWORK / SKILLS

- | | | | |
|-------------------------------------|--------------------|------------------------|-------------------|
| • Data Structures & Algorithms | • Deep Learning | • Pandas | • OpenCV |
| • Operating Systems | • NLP | • NumPy | • OOPS Concept |
| • Network Security | • CNN | • Matplotlib | • Web Development |
| • Database Management System (DBMS) | • Scikit-learn | • Seaborn | • Javascript |
| • Machine Learning | • TensorFlow/Keras | • EDA | • Git/GitHub |
| | • PyTorch | • Feature Engineering, | |
| | • XGBoost | • Model Evaluation | |

PROJECTS

PoPo Podcast 🔗 | [WebRTC](#), [FFmpeg](#), [TailwindCSS](#), [JavaScript](#), [Reactjs](#), [CORS](#)

07 2025

- Using WebRTC and FFmpeg and Next.js and TypeScript to be able to make it happen. In essence, you can enjoy live audio/video conferencing, capture anything in crystal-clear clarity and stream it **Video Chat , Chatting**.
- [Live site here](#)

HomeTutor 🔗 |

12 2025

- online home-tutoring platform so that the tutors can be registered and create their profiles there and then we are able to find them, book ourselves and have a personal tutor whenever we need. It already comes with a proper system of logging in, allows us to factor in the most suitable tutor, when they are available, and we can book it in a well-organized and orderly manner making it simple and incredibly reliable.
- [Live Site Here](#)

TypeSync 🔗 |

02 2025

- TypeSync is a real-time multiplayer typing game inspired by Monkeytype. Players can join rooms, type the same text, and see each other's progress live. It tracks WPM, accuracy, and rankings, offering a fast, competitive typing experience with a modern UI.
Frontend: React.js, Tailwind CSS, Socket.io Client Backend: Node.js, Express.js, Socket.io, MongoDB (Mongoose)

Credit Card Fraud Detection 🔗 |

05 2025

- Faced the problem of detecting fraudulent transactions in an imbalanced dataset. Used Python with Pandas, Scikit-learn, and imblearn to preprocess data and train a Random Forest Classifier. Achieved 96–98 accuracy by balancing the data and removing irrelevant features for better model performance

TECHNICAL SKILLS

Languages: Python, Java, C, C++, TypeScript, JavaScript, SQL

Developer Tools: VS Code , IntelliJ Idea Ultimate , PostMan , WebStrome

Technologies/Frameworks: GitHub, ReactJS, NextJS, NodeJS, ExpressJS, Git, MongoDB Atlas

CERTIFICATIONS

- Introduction to Operating Systems - NPTEL
- Programming in Java - NPTEL
