PROJECTS

Scan Pay Go.

Aug 2025 - Oct 2025

A web application that allows users to scan QR codes at merchants, browse products, add to cart, and complete secure, cashless payments. Merchants can manage products, orders, and QR codes, while admins oversee the entire platform. The app provides a fast, seamless, and contactless shopping experience.

Technologies Used:

- Backend: Node.js, Express.js, MongoDB, Mongoose
- Authentication & Security: JWT, bcrypt, role-based access control
- Middleware: Validation, logging, error handling, rate limiting

Credit Card Fraud Detection Using Machine Learning Models

May 2024 - Jul 2024

- Faced the problem of detecting fraudulent transactions in an imbalanced dataset. Used Python with Pandas, Scikit-learn, and imblearn to preprocess data and train a Random Forest Classifier.
- Achieved 96–98% accuracy by balancing the data and removing irrelevant features for better model performance.

SKILLS

- | | | |
|--------------|-------------------|-----------|
| • JavaScript | • React Router | • React |
| • JWT | • Postman | • Axios |
| • Java | • C++ Programming | • MongoDB |
| • REST API | • HTML 5 | • CSS3 |
